To Whom It May Concern:

The Abington Township Police Department has partnered with Sensys Gatso to implement an Automated Red-Light Enforcement (ARLE) program. Like many police departments across the United States, our department dedicates a significant portion of its resources to traffic enforcement, education, and training. In fact, traffic safety has consistently been the highest priority for our citizens and elected officials. The ARLE program is an additional tool designed to reduce the number of traffic accidents and red-light violations at specific locations. Since August 2014, there have been 75,650 violations with a 28% decrease in total crashes and a 25% decrease in angle crashes at our ARLE intersections. Over time, this initiative has served to educate and change driver behavior and led to safer roadways in Abington Township.

Our decision to implement an ARLE program was made with great consideration by our department and elected officials. The staff at Sensys Gatso guided us through this decision-making process and have proven to be exceptional partners in our endeavor to make Abington a safer place to travel. I am confident that the success of the Sensys Gatso ARLE program will continue be evident through fewer violations, fewer crashes, and improved overall traffic safety throughout our Township.

In addition, what truly sets Sensys Gatso apart is their unwavering dedication to the ongoing success and operation of the ARLE program. They have provided comprehensive training for our personnel and continue to offer exceptional customer service, ensuring we are well-equipped to manage the system effectively. Their support has been invaluable in maximizing the program's potential and ensuring its seamless functionality.

Finally, for all the reasons outlined above, I highly recommend Sensys Gatso's Automated Red-Light Camera Program. Their commitment to excellence and partnership has been instrumental in advancing our traffic safety goals, and I am optimistic about the continued positive impact of the ARLE program.

Sincerely,

Patrick Molloy  
Chief of Police
